

the easy windsurfer!

Speed Sail®
NORBERT BLANC SPORTS

PHILOSOPHY

Speed-Sail "The Easy Windsurfer" - a slogan we have maintained for many years. Lan Speed-Sailing is a sport which you can do in your spare time or to high competitive level. It is not restricted to an elite group.

TECHNICAL DETAILS

Because your Speed-Sail will be under considerable stress and strain, particularly in salt water, and because Norbert Blanc Sports wants it to last for many years, all Speed-Sail are made from materials conforming to the highest anti-corrosion criteria.

That's why Norbert Blanc Sports has ensured even greater care in manufacture, particularly in the use of high quality materials, aluminium axles, polyamide trucks, rustproof screws, double ball-bearing in every wheel, wheels solid cast in polyamide & boards made from renewable tropical woods.

SPEED SAIL RACING

The 1.90 meter Racing board is multi-purpose, allowing the user to learn how to sail it and even start in competition.

SPEED SAIL PROFIL

The 2 meters Profile conforms to specific criteria - lighter, more flexible. It easily copes with any type of terrain. Its length allows you to accelerate without losing control. Its original design and the decoration is protected by a layer of epoxy resin, are plus points which put it ahead of the rest.

The Speed-Sail Profile comes with a set of wheel discs for the wheels.

SPEED SAIL - A HOBBY

Speed Sail is essentially for use on beaches but can also be used on sports grounds, disused airports and even on open common ground. But it is advisable to check the local by-law first.

SPEED SAIL - COMPETITION

There are several disciplines available - free style, slalom, triangle and endurance. There is a local club racing at various beaches, a Northern & Southern Championship as well as the British Grand Slam events, which decide the British Champion. There are also the Europeans and finally the World Cup which takes place every two years. The British Land Speed-Sail Association is also starting a Team Championship as well. The British Land Speed-Sail Association is the governing body and will keep you informed of the events in Britain and Europe.

SPEED SAIL SLALOM

The 1.45 meter Slalom board has great manoeuvrability in small areas. Its turning circle is smaller than that of the Racing board.

SPEED SAIL- ANY TIME ANY WEATHER

Don't wait for a Force 2 to go Land Speed-Sailing. A Speed Sail with a 5 m² sail will perform very well. With a Speed-Sail you can practice at any time and in the "dry". You can learn easily as long as you know the elementary rules.

You would never think of making your first snow ski on a black run at top speed ! A light wind and a small sail will allow you to familiarise yourself with Speed-Sail safety.

MACADAM SPEED SAIL

Macadam Speed Sail, Speed Sail's little brother is sized and designed to roll on macadam. If you live too far from the beach, with Macadam Speed Sail you'll have lots of fun and get great vibrations !

Macadam Speed Sail is easy to handle, turns light and reacts swiftly. Its rubber tyres allow it to follow ground contours closely.

A Speed Sail designed for town, with outstanding mechanical set and bearing that will last a lifetime.
